SKILLS

- **Robotics:** ROS2, SLAM, Path Planning, Localization, Kinematics, Isaac Sim, Isaac Lab
- **ML & Perception:** Deep Learning, Reinforcement Learning, Computer Vision, 3D Perception, PyTorch, Gymnasium, OpenCV, World models(VLA)
- **Software:** Python, C++, Linux, Git, Docker, FastAPI, PostgreSQL
- **Hardware:** NVIDIA Jetson, 3D Printing, Fusion 360

EXPERIENCE

Physical AI Engineer, Circle, Almaty May 2026 - Current

- Built a sim-to-real imitation-learning pipeline in NVIDIA Isaac Lab for the myCobot 280
- Trained a visuomotor policy via behavior cloning + PPO fine-tuning

Robotics Engineer, XBOT, Almaty February 2026 - May 2026

- Deployed autonomous SLAM navigation based on IMU, LiDAR and path planning using ROS2
- Built voice pipeline AI Agent with robot control of gestures and navigation across building
- Implemented locally LLM, RAG, STT, TTS, and wake up word on NVIDIA Jetson Orin NX

Quadruped Robotics Hackathon Winner, Astana October 2025

- Implemented autonomous navigation and path planning using SLAM in ROS2
- Developed real-time web interface for robot control via custom ROS2 bridge
- Achieved 1st place competing against university teams

Unitree Go2 Building Inspection Researcher, KBTU (Almaty) February 2025-November 2025

- Collaborated with Oman University on autonomous inspection robot research
- Designed and implemented inspection system based on YOLOv11
- Developed global localization and path planning for indoor building navigation
- Designed robot elevator interaction using manipulator arm mounted on quadruped robot

Machine Learning Engineer, Avto-time, Almaty July 2025 - February 2026

- Developed end-to-end license plate recognition system using YOLO and OCR
- Designed PostgreSQL database for event logging and analytics
- Connected IP cameras video stream via RTSP to server

Machine Learning Engineer, Doro AI, Almaty November 2024-June 2025

- Google For Startups program participant
- Fine tuned computer vision models for classification and object detection
- Implemented and fine tuned GAN models for image2image translation
- Production deployment of ML models using FastAPI

EDUCATION

KAZAKH-BRITISH TECHNICAL UNIVERSITY

BEng Robotics and Mechatronics

Almaty, Kazakhstan

2022-2027
